HENRY SCHEIN®

# CHC FOCUS

SERVING COMMUNITY HEALTH CENTERS

2014–2015 WINTER SPECIAL

## We are the **only national** distributor providing **full-service** medical, dental & technology **solutions**

## Infectious Disease Preparedness

*See pages 4–5*

## Flu Vaccine

*Now available for immediate delivery, see page 34*

Rely on Us®

# WELCOME to the Henry Schein CHC Focus

## WE'RE FOCUSED ON HELPING YOU DELIVER QUALITY CARE TO THE COMMUNITY

We share your vision for helping communities and providing high-quality, cost-effective care to the patients you serve. Henry Schein can provide the products, services and support needed to help **Community Health Centers (CHCs)** optimize and expand quality, cost-effective care.

Henry Schein is the **only national distributor** that offers full-service **medical, dental, and technology solutions** to Community Health Centers. Let us supply you with a comprehensive selection of supplies and equipment, electronic health records software, health center design and planning, laboratory setup, educational resources, 340B, diagnostic, and influenza vaccine programs.

Inside this guide, you will find all of the latest CHC news, educational material, as well as key product and service information that can help your team treat the significant number of medical and dental patients that visit your Community Health Center. Whatever the need, you can **Rely on Us** to help you improve your organization's capabilities and performance.

## How Do We Help CHCs?

- Coordinated and integrated solutions with a single, accountable source for all products and services
- Highest quality medical and dental equipment
- Unmatched EMR/practice management solutions to help streamline your data and deliver increased efficiencies
- Discounted purchasing plans for medical and oral health supplies
- Partnerships with the National Association of Community Health Centers (NACHC), purchasing groups and local state associations
- Authorized distributor for the 340B and Prime Vendor Programs
- Online ordering for budget monitoring, purchasing controls, CHC approval process, assigning purchase orders, tracking and purchase analysis reports
- World-class distribution capabilities that support over 120,000 Community Health Centers and health care offices
- Superior customer service, including 99% of all orders being shipped the same day and 99% fulfillment rate (no back orders)
- 24/7 customer ordering options including Web, mail, fax, telephone, and EDI

## Who is Henry Schein?

*Henry Schein, Inc. is the world's largest provider of health care products and services to office-based dental, animal health, and medical practitioners. A Fortune 500® Company and a member of the NASDAQ 100® Index, Henry Schein serves more than 800,000 customers.*

Henry Schein Medical, the Company's medical division, is dedicated to providing customers with a superior experience through expert advice, strategic resources, and integrated solutions that enable the best-quality patient care and complete selection of products and value-added business and technology solutions.

HENRY SCHEIN®

## Helping Health Happen

As the size of our global business has grown, so has the scope of our global corporate social responsibilty program—Henry Schein Cares—an initiative that is dedicated to "helping health happen."

We seek to "help health happen" by expanding access to care for at-risk and underserved populations globally through our focus on three areas:

- Wellness, prevention, treatment, and education
- Emergency preparedness and relief
- Building capacity in the training of professionals and the delivery of health care services

HENRY SCHEIN MEDICAL

Rely on Us™

Public interest in infection control is understandably rising in the wake of reports about the enterovirus and the Ebola virus. Henry Schein is committed to helping our customers better understand how to implement best practices in infection control. To that end, below are a series of links that provide guidelines on ensuring precautions are taken to minimize the risk of infection. You can find them all at **www.henryschein.com/ICP**.

**Before ordering any product, please ensure the products are appropriate for the level of protection you need.**

APIC: **Ebola (EVD) Guidance for US Healthcare Professionals**

CDC: **Algorithm — Identify, Isolate, Inform; Emergency Dept. Evaluation and Management for Patients who Present with Possible EVD**

CDC: **Guide to Infection Prevention for Outpatient Settings: Minimum Expectations for Safe Care**

CDC: **Health Care Facility Preparedness Checklist for Ebola (EVD)**

CDC: **Health Care Provider Preparedness Checklist for Ebola (EVD)**

CDC: **Interactive Tool for Appropriate Use and Selection of Personal Protective Equipment**

CDC: **Specimen Collection, Transport, Testing, and Submission for Patients Suspected with EVD**

CDC: **Tightened Guidance for U.S. Healthcare Workers on Personal Protective Equipment for Ebola**

CDC: **Up to Date Information on Ebola (EVD)**

Department of Health and Human Services: **Open Letter to Healthcare Professionals about Ebola (EVD) Preparedness**

Henry Schein: **Infection Control In the Office**

Henry Schein: **Infection Control Preparedness Product Guide**

HIDA: **Ebola Resource Center**

WHO: **Ebola (EVD) Protective Measures for Medical Staff**

WHO: **Health-Care Facility Standard Precautions: Key Elements at a Glance**

The Henry Schein Ebola Relief Fund has been established through the Henry Schein Cares Foundation, a 501(c)(3) organization, to provide a way for Team Schein Members and others who are interested in supporting relief efforts to contribute. Henry Schein will match all donations contributed to this fund by Team Schein Members, and the proceeds will be applied directly and completely to Ebola relief efforts through the CDC Foundation, which helps the U.S. Centers for Disease Control and Prevention do more work faster to fight threats to health and safety, as well as other relief organizations.

# ANTIBIOTIC USE FUELS THE RISE OF BACTERIAL RESISTANCE

Each year in the United States, at least 2 million people become infected with bacteria that are resistant to antibiotics and at least 23,000 people die each year as a direct result of these infections. Particularly of concern is Methicillin-resistant staphylococcus aureus (MRSA), which costs the US health care system up to $34 billion a year and accounts for over 8 million additional hospital days, killing more people every year than homicide, HIV/AIDS, Parkinson's disease, and emphysema combined. Many more people die from other conditions that were complicated by an antibiotic-resistant infection.

Antibiotic resistance has been called one of the world's most pressing public health problems. Almost every type of bacteria has become stronger and less responsive to antibiotic treatment when it is really needed. These antibiotic-resistant bacteria can quickly spread to family members, schoolmates, and co-workers – threatening the community with a new strain of infectious disease that is more difficult to cure and more expensive to treat. For this reason, antibiotic resistance is among CDC's top concerns.

This complex problem can cause significant danger and suffering for patients who have common infections, once easily treatable with antibiotics. If a microbe is resistant to many drugs, treating the infections it causes can become difficult or even impossible. Someone with an infection that is resistant to a certain medicine can pass that resistant infection to another person. In this way, a hard-to-treat illness can be spread from person to person. In some cases, the illness can lead to serious disability or even death. For this reason, forward thinking clinicians are pursuing regimens that highlight treatments that do not contribute to bacterial resistance.Silver safely kills over 650 disease-causing bacteria, viruses, fungi, parasites, and molds, and at present, has no known negative side-effects.

Below, Henry Schein Medical presents two efficacious multivalent nano-silver products that kill MRSA, VRE, E. Coli and p. acne on contact, while directly addressing the concern of bacterial resistance.

*For recent MRSA treatment guidance, see Infectious Diseases Society of America (IDSA) website.*

**U.S. patients per year whose infections aren't treatable with the existing array of antibiotics have reached the 2 million mark.** *Source CDC*

**Antibiotic use, appropriate or otherwise, contributes to the development of antibiotic resistance. This is true for acne medications that contain antibiotics.** *Source CDC*

SILVRSTAT®
Antibacterial Wound Dressing Gel

## SilvrSTAT® (Rx) Antibacterial Wound Dressing Gel

**A Powerful New Anti-Microbial That Protects Against MRSA/ Bacteria**

**3 oz. size is the BEST VALUE SAVE 30% vs. the 1 oz. size**

**Advantage**

- SilvrSTAT is a **NEW** type of silver that immediately and continuously kills harmful bacteria
- ***It is the only multivalent silver FDA indicated to inhibit MRSA***
- ***NOT*** an ionic silver and ***NOT*** deactivated by saline irrigation
- It **DOES NOT** create bacterial resistance like traditional antibiotics
- Transparent, water-based, no-alcohol, alginate or sulfa
- No known adverse events or allergies
- Cost competitive with other silver products
- Can be used as House Stock with huge cost savings

**Indications:** Pressure/Stasis/Diabetic Ulcers, Surgical Incision Sites, Device Insertion Sites, Graft/Donor Sites, 1st–2nd Degree Burns, Lacerations, Abrasions, and Skin Tears

**1 oz. Tube (685-0183)**
**3 oz. Tube (685-0184)**

**SilvrSTAT is reimbursable under HCPCS Code A6248**

***For more information or to order, visit:***
**www.henryschein.com/silvrstat**

Introducing
ACNIZIL™
**Professional Acne Management**

**ACNIZIL™ is formulated with a proprietary and patented nanoparticulate silver clinically proven to kill the propionibacterium acnes (P. acnes) bacteria.**

- Clinically proven to kill P. acnes bacteria
- No known side effects
- No harmful acids or peroxides
- Alcohol-free I Color-free I Fragrance-free
- No parabens
- Rapid and continuous bactericidal activity that does not build up resistance
- Less expensive than many antibiotics

**Patient applies Acnizil to skin daily in AM and PM.**
**Can be used under make-up.**
**Only available through health care professional.**

**856–0011** Acnizil™ 1.5 oz. Tube

# ARE YOU LOOKING TO EXPAND THE REACH OF YOUR COMMUNITY HEALTH CENTER?

We understand that Health centers are a key part of how the Affordable Care Act is working to improve access to care for millions of Americans. Over the past 6 months more than $600 million in grant money has been awarded to health centers (150 brand-new health center sites in underserved areas), in an effort to expand access to preventive and primary health care services, for over 2 million additional patients.

**Are you exploring improving access to care and services in your community?**
Whether you are looking to update or expand your facility or build a new access site, considerations should include:

- Ability to accelerate productivity
- Adaptability of furnishings to patients and staff
- Aesthetics and compatibility with overall design elements
- Ergonomic soundness
- Environmental impact
- Warranties to protect your equipment investments

Over the past 30 years, Henry Schein has provided the products, services and support to help Community Health Center's expand your facilities, ensuring that you can continue to help deliver increased efficiencies, increased comfort for your staff and patients, and improved patient care to your community. Our team of experienced CHC specialists will work through the whole process with you, to ensure that all your expectations and timelines are met successfully.

To schedule a complimentary in-office consultation, please contact your local sales consultant or call 1-800-772-4346, or visit:
**www.henryschein.com/requestinfo**

To review our online Community Health Center checklist, please visit:

# Save
## patients money
on their medications

HENRY SCHEIN® MEDICAL

POWERED BY: USA Rx

**Henry Schein is proud to present the USA Rx pharmacy discount card that will save your patients money.**

**Get trusted discount cards sent to your office!**

Call us at: **1-877-581-4526**
or email us at **henryschein@usarx.com**

### About the USA Rx Card

- Free for patients and free for practices
- Accepted at over 60,000 pharmacies across the U.S.
- No paperwork or enrollment
- Cards are preactivated and ready to use
- Share your card with your family and friends
- Covers brand and generic medications

### Benefits to Your Practice

- Patients love the free savings
- Increased medication compliance
- Increased patient loyalty
- Fewer pharmacy calls

**Patients Save, Practices Win**

### The card without limits

Our program covers most FDA approved brand and generic prescription drugs so you can make the best choices for you and your family.

### Patients love the free savings

Patients simply take the card to the pharmacy and save up to 75% on their medications.

Accepted at over 60,000 pharmacies across the U.S.

- Walgreens
- Kroger
- Target
- Walmart
- CVS
- Rite Aid
- Costco
- The Medicine Shoppe
- Safeway
- Winn-Dixie

This is not Insurance. This is not a Medicare prescription drug plan.
Henry Schein receives a fee from USA Rx for card transactions

HENRY SCHEIN®
**URISPEC™ URINALYSIS CONTROLS**
For Most Brands of Routine Urine Dip Sticks and Pregnancy Tests
A bilevel product packaged in plastic tubes and dropper bottles. Controls are liquid, ready-to-use, and are designed to validate urinalysis reagent strips. Packaged in plastic dip tubes and dropper bottles, they are convenient and easy to use. Long open- and closed-vial stability at 2°C–8°C for 2 years unopened, or 90 days once the Dip Control is opened, and 180 days once the Drop Control is opened. This allows the user ample time to utilize the product before expiration, resulting in cost savings.

3 Bilevel Sets, 15 mL/Tube (6 Vials)
Dip stick in tube, with open-vial stability of 90 days at 2°C–8°C."
**(112-6841)** .....ea

2 Bilevel sets, 25 mL/Dropper Bottle (4 Bottles)
Open-vial stability of 180 days at 2°C–8°C
**(112-6842)** .....ea

HENRY SCHEIN®
**URISPEC™ GP+A URINE REAGENT TEST STRIPS**
Test for glucose and protein, with an ascorbic acid test for accuracy.
- Protein and glucose
- Ideal for metabolic, kidney, and diabetic monitoring
- Dip and read in 60 seconds

## Afinion™ Test System

The Afinion™ AS100 Analyzer provides valuable near-patient testing for today's health-care professionals. It utilizes the latest technology and provides a simple, fast, and reliable method to monitor patients' disease progression.

- Multiassay analyzer system
- 3-minute HbA1c, CLIA-waived
- 5-minute albumin/creatinine ratio (ACR)
- Short test time provides the opportunity for more timely treatment changes
- Easy sample collection and operation, minimal training required
- Reliable, lab-quality results
- No manual calibration required
- Unique integrated fail-safe system
- Allows for input of patient and operator IDs

## Alere™ Cholestech LDX® System

Complete Lipid Profile, Glucose

Lab-accurate lipid profile, glucose, ALT, AST, and hs-CRP results in about 5 minutes* from a simple fingerstick. Allows provider to get results while patient is still in office—provider can counsel and intervene face-to-face. This improves patient compliance and increases control and management of heart disease and diabetes. Reimbursable by Medicare and most private payers.

- CLIA waived**
- Procedure saves time and enhances productivity
- Small, tough, and portable
- Eliminates anxiety of venipuncture; requires only a fingerstick
- On-the-spot adjustment of therapy and improved patient compliance
- Accuracy comparable to laboratory tests
- Saves time: fewer follow-up visits required
- Enhances compliance through teachable moments between healthcare providers and patients

#10-959, Analyzer
**(738-2917)** .....ea
Contains: 1 of each: analyzer, printer, power supply, starter pack, optics check cassette, printer cable, user's manual, procedure manual & training video. Starter pack contains 200 lancets, 200 capillary tubes, 200 capillary plungers, 1 Minipette pipette, 50 pipette tips, 1 accessory tray & 1 fingerstick tip pad.

# CoaguChek XS® System

Roche

Call for Bundle Programs

**CoaguChek XS® System**

PT/INR Monitoring Solution

The next generation in point-of-care prothrombotin (PT) and international normalized ratio (INR) testing, this new system uses exclusive smart technology to help ensure accurate results and offers the flexibility and control that health care professionals need to confidently manage a wide range of anticoagulated patients. It is the only system to perform onboard quality control and determine patient results in a single-test chamber.

- CLIA waived
- Neutralizes therapeutic levels of heparin and LMWH
- INR corrected for hematocrit within specified range; manage a broad array of patients with a single device
- Small sample size (10 µL) for easy dosing
- Strip allows dosing from either top or side for simple blood application
- Small, battery-powered, handheld meter for portability and efficiency
- Onboard controls; no external QC necessary
- Auto-on with strip insertion and auto-off capabilities
- 18-month strip shelf life; no refrigeration needed
- **Made in the USA**

## FREND™ System

This quantitative immunoassay analyzer utilizes disposable kits to provide in-vitro diagnostic results for TPSA. The accurate, automated testing procedure—a simple, 3-step operation—provides results in 4 minutes. No need to batch your sample—run when you are ready. This fully automated device is equipped with an easy-to-use touch-screen interface. The FREND™ is compact and lightweight, allowing for portability.

- With electronic code-chip calibration, there's no need to run liquid calibrators
- Daily electronic system QC control takes only 1½ minutes
- Controls run a minimum of once a month

**(455-0011)** .....ea

**PSAPlus Immunoassay Test**

The PSA Plus cartridge is designed for insertion into the FREND™ System. It measures the level of prostate-specific antigen (TPSA) to aid in the diagnosis and to monitor (or manage) patients with prostate cancer. Provides fast and accurate quantitative in-vitro diagnostic of the protein in human serum or plasma based on the lab-on-a-chip technology.

- Test can be used with either plasma or serum samples
- Maximum reaction time: 4 minutes

**(455-0013)** .....25/box

*CPT Code: 84153†*

NanoEnTek

**FREND™ TSH Test**

Measures the level of thyroid stimulating hormone (TSH), assisting physicians in managing patients with thyroid disorders. Provides fast and accurate quantitative, in-vitro diagnosis of the protein in human serum or plasma based on the lab-on-a-chip technology. Disposable cartridge designed for insertion into the FREND system.

## Piccolo Xpress® Chemistry Analyzer

This fully automated chemistry analyzer provides the accuracy of larger laboratory analyzers in a compact and portable system.

- Only 0.1 cc of whole blood, serum or plasma needed to perform the test
- Small footprint occupies very little counter space
- Easy to use: load sample, insert disc and read results
- Self-contained reagent discs deliver complete results in 12 minutes
- 11 panels are CLIA waived—largest menu on a single platform
- 5 bidirectional USB ports for easy connectivity to EMR/LIS or peripherals

#07P05-01, Piccolo Xpress® Chemistry Analyzer

**(106-6368)** .....ea

Contains: 1–0.1cc Minipette, 1–96-pack of disposable Minipette tips, 1 operator's manual, training CD, 1 power cord, 1 power supply, 10 lithium-heparin tubes, 1 screwdriver & 2–12-packs of results cards.

**CLIA-Waived Test Panels**

#07P02-08, Comprehensive Metabolic Panel: ALB, ALP, ALT, AST, BUN, Ca, CI-, CRE, GLU, K+, Na+, TBIL, $tCO_2$, TP

**(146-0189)** .....10/box

## i-STAT® Handheld System

This fully automated system provides accurate results in minutes for a wide range of tests using just 2 or 3 drops of blood.

- Requires no special sample preparation or user calibration; maintenance is minimal
- Easy to use: Insert blood on the cartridge, insert cartridge into the analyzer and view the results in minutes
- Weighs 18 oz, making it portable
- Operator and patient information can be entered via barcode scanner
- Operator lockout prevents unauthorized users from performing or viewing test results
- Test results are uploaded automatically when placed in the downloader

#04J60-20, iSTAT Handheld System

**(111-3324)** .....ea

Contains: analyzer, printer, simulator, downloader & manual.

Abbott Point of Care

# Say "Hello" to the newest addition to the Sysmex family

Sysmex provides automated hematology analyzers that are ideally suited for physician office laboratories, clinics and small hospitals.

They allow you to perform moderately complex testing with simple operation, minimal maintenance and compact, space-saving designs.

## Sysmex XP-300 Automated Hematology Analyzer

This talented addition to our family weighs just 62 pounds and measures a compact 16.5" x 19" x 14". It analyzes up to 60 open-tube samples per hour with the included barcode reader and graphic printer. Our new analyzer delivers an impressive 17 parameter CBC, including a 3-part WBC differential with an absolute neutrophil count (ANC) using an intuitive color touch screen.

# Market Leader in POL Chemistry

Based on proven instrument technology, the ACE Axcel Clinical Chemistry System provides reliable, accurate results in a small footprint. With 12 consecutive years of award-winning customer excellence, it's no surprise that Alfa Wassermann is #1 in chemistry analyzers for the Physician Office Laboratory.

## The ACE Axcel™ Clinical Chemistry System

- Run between 15 CMP/Lipids to 50 CMP/Lipids per day
- Ready-to-use liquid reagents
- No external water or waste drain required
- Closed tube sampling improves safety and workflow

ALFA WASSERMANN

# Dimension® EXL™ 200 Integrated Chemistry System

This system offers revolutionary LOCI® advanced chemiluminescent technology and automated, productivity-enhancing features for the smaller-sized laboratory.

**Immunoassay:**

- 167 tests per hour
- Homogeneous chemiluminescent technology
- Short reaction times: no washing or separation steps
- Excellent STAT testing capability
- Low sample volume required
- **Trusted, proven technologies:**
- LOCI® advanced chemiluminescence, with a maximum throughput of 624 tests per hour (437 photometric tests per hour, 187 ISE tests per hour)
- Heterogeneous module
- Photometry
- QuikLYTE® IMT
- User-defined serum index (HIL) testing
- Automation capabilities
- **Fewer manual tasks:**
- No manual reagent preparation
- No manual sample pretreatment
- No limit or dedicated STAT positions required

With 3 ways to activate and a broader range of sizes than most other brands, SurGuard®3 is the industry's most adaptable safety needle. Add separate thumb and finger grips, unequalled sharpness,* and competitive pricing, and you'll understand why we say SurGuard®3 is the one needle that fits *every* clinician's style.

Plus, SurGuard®3 has the sharpest needles among major brands tested.*

- 10% sharper than similar needles from other leading brands
- More comfortable injections for patients

**Bottom line:** No matter what you're looking for in a needle, you're looking for SurGuard®3.

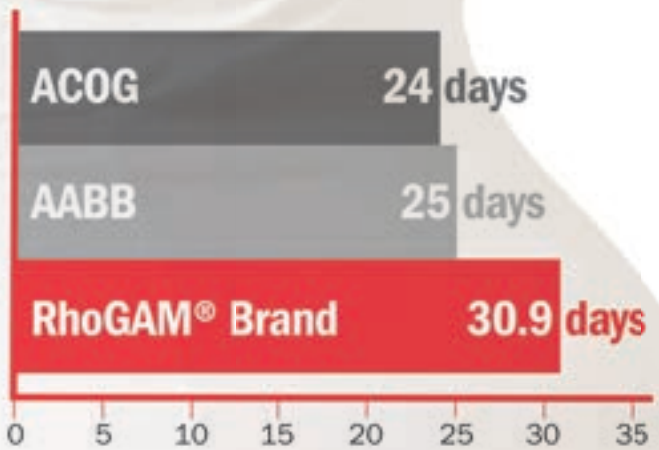
*For Rh-negative patients*

# Protection that stands the test of time

## *RhoGAM® Brand aligns with ACOG and AABB recommendations*[1,2,3]



*This chart shows that the mean elimination half-life of RhoGAM® Brand exceeds the half-life on which the ACOG (American Congress of Obstetricians and Gynecologist) and AABB (American Association of Blood Banks) dosing guidelines were based.*

## *During the critical prenatal time*

- All Rh-negative expectant moms must be protected from Rh sensitization
- Risk of sensitization increases as pregnancy term progresses[1]
- The greater the half-life of an anti-D product, the more anti-D that is present at pregnancy term

## *Consider the importance of time*

- RhoGAM® Brand has a mean elimination half-life of 30.9 days[3]
- ACOG dosing recommendations are based on a 24-day half-life[1]
- AABB dosing recommendations are based on a 25-day half-life[2]

**RhoGAM®**
***Ultra-Filtered PLUS***
**$Rh_0$(D) Immune Globulin (Human)**

**Important Safety Information**

RhoGAM® and MICRhoGAM® Ultra-Filtered PLUS Rho(D) Immune Globulin (Human) are made from human plasma. Since all plasma-derived products are made from human blood, they may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. RhoGAM® and MICRhoGAM® are intended for maternal administration. Do not inject the newborn infant. Local adverse reactions may include redness, swelling, and mild pain at the site of injection and a small number of patients have noted a slight elevation in temperature. Patients should be observed for at least 20 minutes after administration. Hypersensitivity reactions include hives, generalized urticaria, tightness of the chest, wheezing, hypotension and anaphylaxis. RhoGAM® and MICRhoGAM® contain a small quantity of IgA and physicians must weigh the benefit against the potential risks of hypersensitivity reactions. Patients who receive RhoGAM® and MICRhoGAM® for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

**Please see next page for Brief Summary of RhoGAM® Brand Prescribing Information. For Full Prescribing Information, visit www.RhoGAM.com**

## *MICRhoGAM® Ultra-Filtered PLUS (50 µg) (250 IU)*

**Rx Only**

**For Intramuscular Injection Only**

*Prefilled syringes, preservative-free (thimerosal free), latex-free delivery system*

### INDICATIONS AND USAGE

**Pregnancy and other obstetrical conditions**

For administration to Rh-negative women not previously sensitized to the $Rh_0$(D) factor, unless the father or baby are conclusively Rh-negative.

- Delivery of an Rh-positive baby irrespective of the ABO groups of the mother and baby
- Antepartum prophylaxis at 26 to 28 weeks gestation
- Antepartum fetal-maternal hemorrhage (suspected or proven) as a result of placenta previa, amniocentesis, chorionic villus sampling, percutaneous umbilical blood sampling, other obstetrical manipulative procedure (e.g., version) or abdominal trauma
- Actual or threatened pregnancy loss at any stage of gestation
- Ectopic pregnancy

To maintain an adequate level of anti-D, RhoGAM should be administered every 12 weeks. If delivery of the baby does not occur 12 weeks after the administration of the standard antepartum dose (at 26 to 28 weeks), a second dose is recommended to maximize protection antepartum.

**Transfusion of Rh-incompatible blood or blood products**

- Prevention of Rh immunization in any Rh-negative person after incompatible transfusion of Rh-positive blood or blood products (e.g., red blood cells, platelet concentrates, granulocyte concentrates)

### CONTRAINDICATIONS

- The use of RhoGAM and MICRhoGAM is contraindicated in Rh-positive individuals.

### DOSAGE AND ADMINISTRATION

**For intramuscular use only, do not administer intravenously.**

**Pregnancy and other obstetrical conditions**

RhoGAM (300 µg) (1500 IU)
- Postpartum — if the newborn is Rh-positive. Administer within 72 hours of delivery.
- Antepartum —
  - –Prophylaxis at 26–28 weeks gestation.
  - –At or beyond thirteen weeks gestation: administer within 72 hours when suspected or proven exposure to Rh-positive red blood cells occurs resulting from invasive procedures, abdominal trauma or obstetrical manipulation, ectopic pregnancy, pregnancy termination or threatened termination.

Administer every 12 weeks starting from first injection to maintain a level of passively acquired anti-D. If delivery occurs within three weeks after the last antepartum dose, the postpartum dose may be withheld, but a test for fetal-maternal hemorrhage should be performed to determine if exposure to >15 mL of red blood cells has occurred.

MICRhoGAM (50 µg) (250 IU)

- Administer within 72 hours of actual or threatened termination of pregnancy (spontaneous or induced) up to and including 12 weeks gestation.

**Transfusion of Rh-incompatible blood or blood products**

Administer within 72 hours.

RhoGAM (300 µg) (1500 IU)
- 2.5–15.0 mL Rh-positive red blood cells
- >15.0 mL Rh-positive red blood cells (multiple syringes)

MICRhoGAM (50 µg) (250 IU)
- < 2.5 mL Rh-positive red blood cells

### WARNINGS AND PRECAUTIONS

**Warnings**

- For intramuscular use only, do not inject intravenously.
- In the case of postpartum use, the product is intended for maternal administration.
- Do not inject the newborn infant.
- Patients should be observed for at least 20 minutes after administration.
- Administer with caution to patients who have had prior severe systemic allergic reactions to human immune globulin.
- RhoGAM / MICRhoGAM contain a small quantity of IgA. There is a potential risk of hypersensitivity in IgA deficient individuals.
- Patients treated for Rh-incompatible transfusion should be monitored by clinical and laboratory means for signs and symptoms of a hemolytic reaction.
- Store at 2 to 8°C. Do not store frozen.
- Do not use after the expiration date printed on the syringe.

**Parenteral drug products should be inspected visually for particulate matter, discoloration and syringe damage prior to administration. Do not use if particulate matter and / or discoloration. The solution should appear clear or slightly opalescent.**

**Use of Plasma Derived Products**

RhoGAM and MICRhoGAM are made from human plasma and may carry a risk of transmitting infectious agents, e.g., viruses, and theoretically the Creutzfeldt-Jakob disease (CJD) agent. The risk that such products will transmit an infectious agent has been reduced by screening plasma donors for prior exposure to certain viruses, by testing plasma for the presence of certain current virus infections and by using pathogen removal and inactivation techniques during the manufacturing process. All of the above steps are designed to increase product safety by reducing the risk of pathogen transmission.

Despite these measures, such products can still potentially transmit disease. There is also the possibility that unknown infectious agents may be present in such products. All infections thought by a physician possibly to have been transmitted by these products should be reported by the physician or other healthcare provider in the United States to Ortho-Clinical Diagnostics, Inc. at 1-800-421-3311. Outside the United States, the company distributing these products should be contacted. The physician should discuss the risks and benefits of these products with the patient.

### ADVERSE REACTIONS

Adverse events (AE) after administration of RhoGAM and MICRhoGAM are rare.

The most frequently reported AEs are anti-D formation and injection site reactions, such as swelling, induration, redness and mild pain or warmth. Possible systemic reactions are skin rash, body aches or a slight elevation in temperature. Severe systemic allergic reactions are extremely rare. Patients should be observed for at least 20 minutes after administration. There have been no reported fatalities due to anaphylaxis or any other cause related to RhoGAM or MICRhoGAM administration.

As with any $Rh_0$(D) Immune Globulin (Human), administration to patients who are Rh-positive or have received Rh-positive red blood cells may result in signs and symptoms of a hemolytic reaction, including fever, back pain, nausea and vomiting, hypo- or hypertension, hemoglobinuria/emia, elevated bilirubin and creatinine and decreased haptoglobin.

RhoGAM and MICRhoGAM contain a small quantity of IgA (less than 15 µg per dose). Although high doses of intravenous immune globulin containing IgA at levels of 270-720 µg/mL have been given without incident during treatment of patients with high-titered antibodies to IgA, the attending physician must weigh the benefit against the potential risks of hypersensitivity reactions.

### DRUG INTERACTIONS

Immune globulin preparations including $Rh_0$(D) Immune Globulin (Human) may impair the efficacy of live vaccines such as measles, mumps and varicella. Administration of live vaccines should generally be delayed until 12 weeks after the final dose of immune globulin. If an immune globulin is administered within 14 days after administration of a live vaccine, the immune response to the vaccination may be inhibited.

Because of the importance of rubella immunity among women of childbearing age, the postpartum vaccination of rubella-susceptible women with rubella or MMR vaccine should not be delayed because of the receipt of $Rh_0$(D) Immune Globulin (Human) during the last trimester of pregnancy or at delivery. Vaccination should occur immediately after delivery and if possible, testing should be performed after 3 or more months to ensure immunity to rubella and if necessary, to measles.

### USE IN SPECIFIC POPULATIONS

**Pregnancy Category C**

Animal reproduction studies have not been conducted with RhoGAM or MICRhoGAM. The available evidence suggests that $Rh_0$(D) Immune Globulin (Human) does not harm the fetus or affect future pregnancies or the reproduction capacity of the maternal recipient.

**Rh Blood Type**

RhoGAM or MICRhoGAM Rho(D) Immune Globulin (Human) should only be administered to Rh-negative patients exposed or potentially exposed to Rh-positive red blood cells to prevent Rh immunization.

### OVERDOSAGE

Repeated administration or increased dosage in Rh-negative individuals should not cause more severe or more frequent adverse reactions than the normal dose. Patients who receive RhoGAM or MICRhoGAM for Rh-incompatible transfusion should be monitored by clinical and laboratory means due to the risk of a hemolytic reaction.

### DESCRIPTION

RhoGAM and MICRhoGAM $Rh_0$(D) Immune Globulin (Human) are sterile solutions containing immunoglobulin G (IgG) anti-D (anti-Rh) for use in preventing Rh immunization. They are manufactured from human plasma containing anti-D. A single dose of RhoGAM contains sufficient anti-D (300 µg or 1500 IU) to suppress the immune response to up to 15 mL of Rh-positive red blood cells. A single dose of MICRhoGAM contains sufficient anti-D (50 µg or 250 IU) to suppress the immune response to up to 2.5 mL of Rh-positive red blood cells.

The final product contains 5 ± 1% IgG, 2.9 mg/mL sodium chloride, 0.01% Polysorbate 80 (non-animal derived) and 15 mg/mL glycine. Small amounts of IgA, typically less than 15 µg per dose, are present. The pH range is 6.20–6.55 and IgG purity is ≥ 98%. The product contains no added human serum albumin (HSA), no thimerosal or other preservatives and utilizes a latex-free delivery system.

### CLINICAL PHARMACOLOGY

RhoGAM and MICRhoGAM act by suppressing the immune response of Rh-negative individuals to Rh-positive red blood cells. The mechanism of action is unknown. RhoGAM, MICRhoGAM and other $Rh_0$(D) Immune Globulin (Human) products are not effective in altering the course or consequences of Rh immunization once it has occurred.

BRAND PROMISE

HENRY SCHEIN®
**DISPOSABLE VAGINAL SPECULA–LIGHT SOURCE COMPATIBLE**

Disposable specula are made of high-strength, clear, nontoxic plastic. Allow examination of the vaginal mucosa at 360° angle without rotation. Provide wide range of adjustability (angular and elevation adjustments), ease of operation and manipulation with one hand. Self-holding in various opening positions. Single use of speculum decreases the risk of cross contamination. Compatible with corded light source of leading brands, eliminating the need for positioning a light source independently.

## advanced wound care

**Advazorb® Border**

Hydrophilic Foam Dressing with Soft Silicone Adhesive

Absorbent, atraumatic, self-adhesive bordered dressings with a unique, perforated soft silicone wound contact layer. The silicone wound contact layer has large pores which enable the passage of exudate into the absorbent foam, while protecting the fragile wound bed. The dressings stay in place comfortably, while minimizing the potential for maceration. Waterproof backing.

Areas of use:
- Acute and chronic wounds
- Pre-tibial lacerations
- Cuts, abrasions, and surgical wounds
- Superficial burns
- Leg ulcers, pressure ulcers, and diabetic ulcers

**Advazorb® Border**
3" x 3"

# YOUR WORK OF ART: MANAGING PAIN AT THE WOUND BED AND WOUND BED PROTECTION

Presented by: Diane Heasley, RN, MSN, MEd, WOC, WCC, DAPWCA, CNS

When a patient comes to receive care for a chronic or acute wound, the clinician follows a critical pathway of care to ensure the best outcome for that particular client. Factors which are examined and taken in to account are nutrition, hydration, infection prevention, mobility, pressure relief, vascular competence, associated pain, dignity, and overall quality of life. In this era of cost-cutting, many times the sick are caring for the sick and, even though it may be ones' wish to be able to go home to heal, this may be a virtual impossibility because of all of the logistics of care. Wounds, even postoperative wounds, can be complex and individuating a plan of care is critical. **In my journeys, I have found that three of the most taken-for-granted issues are pain at the time of dressing change, protection of fragile new tissue and/or grafting sites, and decreasing the chance of infection utilizing the correct dressing which has longevity.**

The first issue and the easiest to tackle is the longevity of time between surgical dressing changes. The every-eight-hour-dressing has been replaced with dressings which last three days and even up to fourteen days! **Every time a dressing is changed, it may lead to contamination and possible infection.** If a wound is exuding, even with sutures, it stands to reason that microbes may get in if drainage can come out. Absorption, to prevent maceration of the periwound site, is essential. Along with traditional absorptive materials like gauze, there is a whole new generation of foams which provide the needed tamponade for hemostasis of a fresh wound to providing temperature control of the base so that fibroblasts form and allow for expedient granulation and closure. This is especially important in arterial-insufficient wounds. Once a dressing is removed, it can take up to twelve hours for the tissue temperature to be resumed to a level at which fibroblasts may be manufactured. If a dressing is done every shift, then not only are we exposing it to contamination by human error, but also to dropped tissue temperatures. Surgically, this helps provide early stabilization, especially for a patient on anticoagulants. **In addition to foams, there is a new category of dressings termed "super absorbents."** Just as their title states, they absorb very large amounts of fluid, wicking it away and preventing damage to the periwound. They literally trap moisture in channel-like structures not allowing re-entry onto the wound site. They are ideal for cellulitic wounds, wounds suffering from large fluid shifts in the periphery, and venous-insufficient wounds.

**The next difficult issue to manage is the fragility of a fresh wound bed during dressing removal. This is particularly critical in fresh graft sites, sites being ready to be grafted, and in traumatic wounds which may leave vasculature exposed.** Granulation budding can be destroyed by improper dressing removal. As the blood at the base of the wound clots, fibers of a dressing may become entangled, and although it is important for a wound bed to remain free of debris, if granulation budding has started, it too may become entangled in the removal process. Contact layers allow for treatment of the wound base while protecting the fragility of the new tissues. **There are new silicone-based dressings which allow for breathability as well as absorption, but at the same time, allow for trauma-free removal.** The silicone is slightly adhesive, allowing, once again, for tamponade, but also removal becomes a breeze. Adhesives can be the bane of fragile paper-thin skin, so preventing stripping is a key focus. Placing tension behind the area of lifting is an old trick in removal, but imagine not having to do this and being able to lift while protecting the base. Many a skin graft has been lost secondary to inappropriate dressing removal. Nothing can be more frustrating than having all of the long hard work of a graft being compromised because of poor technique or choice. Many times, the patient will have to go to skilled care postoperatively and in some cases, the nursing staff may have never cared for a fresh graft site. This could be a disastrous situation. If a dressing is to be kept on for a long period of time with a traditional adhesive, the actual glue may cause skin irritation and subsequent breakdown. In addition to surgical wound issues, flap skin tears are very common in the chronically ill and the elderly. Poor protein stores, medications, and immobility may lead to fluid shifts with shearing at the skin level. Managing the tear can lead to it healing and leaving other skin tears around the original site secondary to adhesive stripping. More and more plastic surgeons are being consulted to intervene in large tears and degloving injuries. Tissue desiccation may happen postsuturing or reapproximating. The invention of the silicone-based dressing allows for visualization, treatment, and trauma-free removal.

**The last hurdle, which is often an afterthought, is pain at the wound site during treatment and after treatment.** The first very important thing to keep in mind is that pain is different for different people. It may not always be elicited as "ouch" but especially in the young or those with some type of dementia, may manifest itself in behaviors such as not eating, teeth grinding, aggression towards others, and falling out of bed. Yes, falling out of bed can indicate claudicating pain in diabetics and arterial insufficient clients. Their legs will dangle over the side of the bed below the heart providing pain relief and then the trunk follows the legs on to the floor. Arterial wounds, in those lucid enough to tell the story, have been described to me as "having a hot poker placed in the wound bed, horrible, incessant." If a client is fearful of treatment, then not only is the healing interrupted, but the trust in the physician delivering care is also compromised. Second degree burns, epidermolysis bullosa, arterial ulcers, and dehisced incisions all carry a stigma of pain. The aforementioned silicone-based dressings are wonderful for pain management and removal, but interestingly enough, 100% medical-grade Manuka honey has been clinically efficacious and touted as a wonderful way to manage pain at the site of a wound. This does NOT replace intradermal injection for the patient during surgical debridement, but rather as a postdebridement managing tool. Systemic management is often not enough, but because of restraint reduction, it may be provided in less than a significant therapeutic amount. **Evidence-based research has shown that 100% preservative- and coloration-free Manuka honey has reduced the need for narcotic usage by as high as 70% in conjunction with the usage of a silicone-based absorbent dressing. Compliance with care soars when pain is being managed, eating is better, and mobility improves. These are clinical facts which can't be disputed.**

The job of a physician, a surgeon, a nurse is not easy. Wound care, a science and an art, needs to be viewed holistically and collaboratively. The usage of pain-inhibiting and easy-release dressings with longevity also decrease the chance of infection. Embracing the newest of technologies eases the worry of what could happen and ultimately improves patient outcomes by preserving your work of art.

HENRY SCHEIN® SolutionsHub

Rely on Us™

## Our Focus

In today's changing health care landscape, it is important to have immediate, unlimited access to a trusted advisor. Henry Schein's team of local experts is responsible for bringing solutions, products, and services to health care settings nationwide–and can be reached at your convenience. By providing you meaningful, valued solutions, we aim to help you run a successful business and achieve superior clinical outcomes.

## Revenue Generation

### *Clinical Lab Solutions*

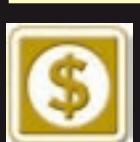
Henry Schein Medical's LabTeam™ is a one-stop source for consultation and analysis within the laboratory setting. We will improve your patients' experiences in the office as they navigate profitability and regulatory requirements.
**Phone: 1-800-428-9200**; **E-mail: labquestions@henryschein.com**

### *Rx Solutions*

The Henry Schein Rx Samples Service is a free and secure online service that enables 500,000 eligible prescribers to order medication samples easily and conveniently. Activate your account at: **www.hsrxss.com. Phone: 1-866-772-1580**; **E-mail: henryscheinRxSamples@emedsample.com**

### *Discount Pharmacy Card*

To reduce health care costs, try the Henry Schein and USA Rx prescription discount card, a small but helpful way for your patients to save. It is 100% free for you and can save your patients up to 75% on prescription drugs.
**Phone: 1-888-229-3270**; **E-mail: henryschein@usarx.com**



## Cost Savings

### *Financial Services*

Henry Schein Financial Services (HSFS) offers a range of solutions that will better position your business. Our experts will help you achieve your business goals and create avenues for continued financial success.
**Phone: 1-800-853-9493**; **E-mail: hsfs@henryschein.com**

### *Coding and Reimbursement*

Henry Schein's coding experts can train your staff on current requirements as well as educate your providers, billing staff, and other staff to understand the importance of proper coding procedures to help boost your practice's bottom line.
**Phone: 1-855-HSM-DM4U (1-855-476-3648)**; **E-mail: consulting@henryschein.com**

### *Continuing Education & CMEs*

Henry Schein supports facilities with training and education opportunities, including OSHA, CLIA, and HIPAA. We also offer complimentary CME credits for nurse practitioners and physicians assistants.
**Phone: 1-800-686-4200**, **E-mail: consulting@henryschein.com**

### *Waste Disposal Services*

Henry Schein has partnered with MedPro to provide you with additional cost-saving opportunities on medical waste disposal. MedPro provides reliable, cost-effective biohazard waste disposal service at a fair, standardized cost. Customers save 30% on average when switching to MedPro.
**Phone: 1-877-302-8051**; **E-mail: henryschein@medprodisposal.com**

## Practice Efficiency

### *Supply Management*

Henry Schein's suite of supply chain services ranges from basic to more complex technologies, multivendor capabilities, and system integrations. Our team of experts will show you how to eliminate duplicate costs, enhance productivity, improve cost management, and implement best practices.
**Call: 1-864-297-3680, opt.2, ext.2278**; **E-mail: medsct@henryschein.com**

### *Full-Service Capital Equipment Program*

The right equipment can bring significant benefits to you, alternate care facilities by increasing the number of treatment options offered to patients, while achieving increased profitability and greater patient satisfaction. Our team of experts can aid in the design, setup, and selection of equipment that can also be standardized across multiple sites.
**Phone: 1-800-772-4346**; **E-mail: medsls@henryschein.com**

### *Revenue Cycle Management*

Henry Schein has partnered with athenahealth, a market-leading provider of cloud-based services for electronic health records (EHR), practice management, patient communication, and care coordination.
